

explain to a kid

API

Simple
Explanation

Swipe

Alex went to a library looking
for a dinosaurs book to read
But with so many books,
where should Alex start looking?

Save this post

So Alex seeks
the librarian for help
The librarian is always ready
to find the right information.

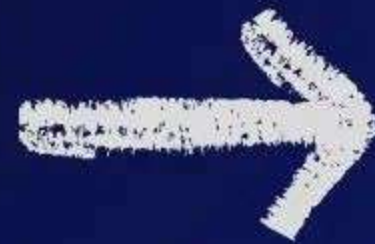

Save this post

The librarian knows
exactly where to look
He quickly finds the
dinosaur book Alex wants.

Save this post

The librarian brings
the book to Alex.
Hooray! Alex can now
read all about dinosaurs.

Save this post

The librarian is the connection between You and the Library

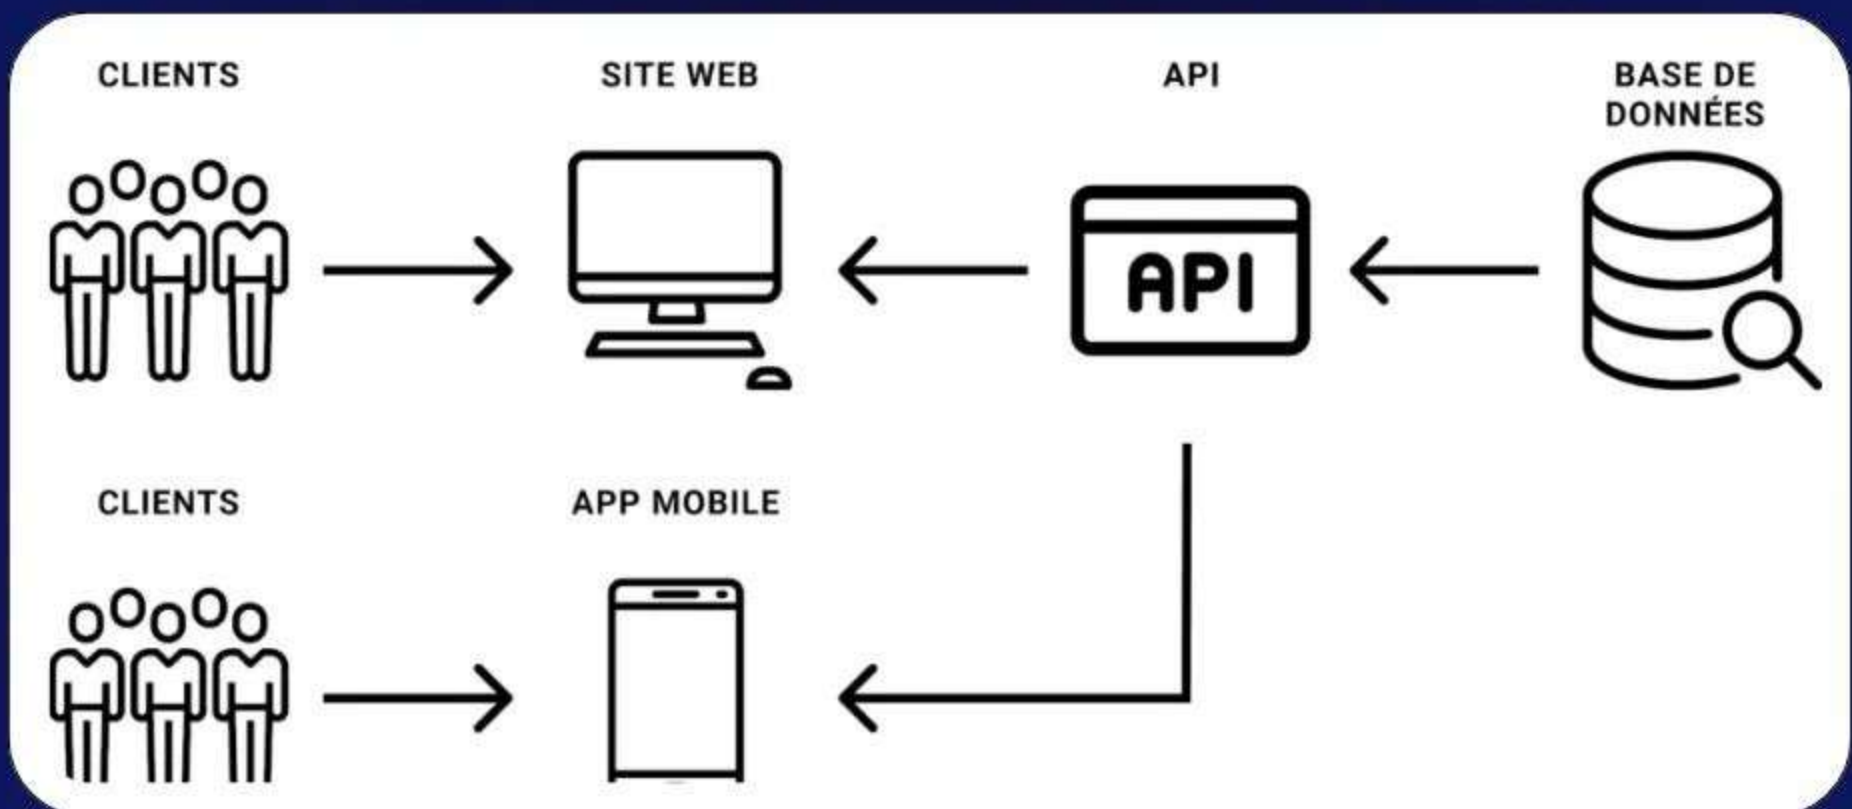

The Librarian act as an API

Conclusion

APIs help different apps work together. They make things faster and easier, like ordering food or checking the weather.
